

The Idaho Aerospace Alliance (IDAA) is made up of manufacturers and service providers that support both the commercial and defense aerospace industries.

The IDAA has strategic alliances with the education community and state agencies to build the aerospace industry within the region. Alliance companies manufacture component parts for aircraft engines, control systems, cabin interiors, cargo systems, defense products and much more.

IDAA members offer everything from the nuts and bolts to the finished Kodiak planes by Quest, and from MRO to the counter-UAS products to keep them flying.

# LAND HERE

Aerospace companies are thriving in Idaho and their innovations continue to strengthen the state's economy.

**Idaho's** varied terrain and high-tech capabilities make the state an ideal location for the research, development and testing of aviation-related products.

The aerospace industry in **Idaho** has grown exponentially thanks to businesses excelling in aircraft assembly, maintenance, parts and equipment manufacturing, and defense articles.

Idaho at AVALON 2019 is funded in part through a STEP grant with the U.S. Small Business Administration.

AeroLEDs has redefined the expectations of aircraft lighting. Their high quality LED landing, taxi and navigation lights are designed to replace legacy lighting while consuming less power, producing more light output and lasting significantly longer. AeroLEDs continues to increase the benchmark for high performance LED lights and is outshining and replacing traditional lighting for safer and more reliable flying.
